

What we Do...

A grower, packer and shipper of California citrus, Bee Sweet Citrus is a leader in today's agriculture industry. Founded in 1987, Bee Sweet Citrus is a family owned and operated company and provides approximately 15 different varieties of citrus to its consumers! Located in the heart of California's Central Valley, Bee Sweet is focused on innovation, sustainability and customer satisfaction.

On the Field

On the field, our team hand-picks all of our fruit for export. To reduce our carbon footprint, we only use the most efficient irrigation methods to maximize water conservation, and we also make sure to utilize newer and more efficient tractors, trucks and semis to minimize emissions.

In the Packing House

In the packing house, we use skylights and VFDs to conserve electricity, and the vast majority of our packaging is recyclable. We've also installed solar panels on our rooftops and recycle water collected from our cold storage defroster for landscaping purposes.
