Executive Summary:

LOS ANGELES UNIFIED SCHOOL DISTRICT Program Evaluation and Research Branch

To: Members, Curriculum and Instruction Committee **DATE:** February 27, 2006
From: Ted Bartell
Subject: EVALUATION OF SPANISH-LANGUAGE READING CURRICULA

Attached please find a copy of the Year 1 (2004-05) evaluation report on the instructional services provided to English Learners enrolled in the Spanish-Language Reading program districtwide. The sample consisted of twenty-four schools that implemented *Lectura* and/or *Foro Abierto* programs for Waiver to Basic students and two Dual Language Immersion schools that implemented *Foro Abierto*. A total of 107 classrooms were observed over two distinct observation periods. Key findings include:

- Forty-one percent of sample K-2 *Foro Abierto* teachers consistently utilized the three major sections of the curricula, 55% of the teachers consistently utilized one or two major sections of the curricula, and the remaining 4 percent of teachers did not use the curriculum at all.
- For the K-2 *Lectura* teachers, 16 percent of the sample teachers consistently utilized the three major sections of the curricula, 64% of the teachers consistently utilized one or two major sections of the curricula, and twenty percent of teachers did not use the curriculum.
- Most of the teachers from both curriculum groups attended the five day Governor's Institute, but few *Lectura* teachers attended on-site professional development.
- Most second grade students (*Lectura* and *Foro Abierto*) showed positive adjusted gains on Spanish reading and language subtests (*Aprenda*).
- Second grade *Lectura* students outperformed *Foro Abierto* students in Spanish reading (*Aprenda*) at every program implementation level. The strongest difference was in classrooms with high program implementation level. The effect size difference was .81.
- The only program offered at third, fourth and fifth grade levels was *Foro Abierto*. The results were not promising in Spanish reading and language (*Aprenda*) nor in English language arts (CST) for third graders, but positive gains in English were found in the majority of sample fourth grade classrooms. Fifth graders had mixed results on all test batteries.
- The correlation of .42 between performance in Spanish reading and performance in English language arts found in this study suggests that mastering Spanish reading may help English learners in acquiring English language arts skills.

If you have any questions regarding this report, please contact Dr. Kathy Hayes, Project Director, at 213-241-5153.

Appendix 2E: ELD Practicum

INTER-OFFICE CORRESPONDENCE
Los Angeles Unified School District

TO: Local District Superintendents Date: October 2, 2009

FROM: Mary Campbell, Administrator 
Language Acquisition Branch

SUBJECT: Elementary Title III ELD Practicum Training

This correspondence outlines the Language Acquisition Branch continuing professional development plan to support the Title III ELD Practicum in elementary schools and to ensure that all teachers of English learners (ELs) are appropriately trained for delivery of instruction.

On September 28, 2004 the Board approved the Title III ELD Practicum as a three-day professional development for teachers to maximize the delivery of the existing English Language Development (ELD) curriculum with enhanced instruction. From 2005 through 2008, K-5 teachers of ELs and elementary administrators participated in the ELD Practicum. Last year, School ELD Trainers, K-5 teachers and elementary administrators were offered four ELD Practicum Support Modules to deepen their knowledge and enhance their instructional practice.

This year, teachers of English learners who have not completed the mandated components of the ELD Practicum at any grade level will be invited to attend the following ELD Practicum components:

- Thinking Maps (one-day pre-requisite for the ELD Practicum)
- ELD Practicum (three-day training by grade level)
- ELD Practicum Support Modules (four one-hour sessions)

The Local District Elementary EL/Access to Core Experts will be working with principals to identify teachers who may be in need of these mandatory professional development components of the ELD Practicum. Details and logistics of training will be shared based on the needs identified for your specific sites.

Administrators who supervise teachers of English learners and who have not completed the administrative training component will be invited to attend the required two-hour session.

Funding for substitute coverage for the ELD Practicum participants will be provided through the LAB Title III funding requests.

Description of Continued Trainings 2009-2010

Thinking Maps® Training

The purpose of this one-day training facilitated by LAB Lead Trainers is to provide K-5 teachers of ELs with prerequisite training of the use of visual tools for scaffolding academic content for instruction prior to participation in the ELD Practicum.

ELD Practicum

The purpose of this three-day school site training facilitated by LD Lead Trainers is to provide K-5 teachers with ELs with methodologies and strategies to maximize the delivery of instruction for English Language Development leading to academic English proficiency. The participants are teachers assigned to teach ELs who have never received the ELD Practicum professional development in any grade level.

ELD Practicum Support Modules for K-5 Teachers

The purpose of this training facilitated by the School ELD Trainers is to deepen the K-5 teachers' understanding of the ELD Practicum. The four one-hour modules include: ELD Strategies, Multi-level Differentiation, Assessing Pull and Write, and the ELD Instructional Tool.

School ELD Trainers

The purpose of this two-day training facilitated by LD Lead Trainers is to enable new School ELD trainers to support K-5 teachers of ELs to deepen and support the delivery of ELD instruction. This support includes facilitating grade-level meetings, providing professional development and modeling lessons.

Elementary School Administrators ELD Practicum Training

The purpose of this two-hour training facilitated by the LD Lead Trainers is to deepen administrative knowledge and support of the ELD Practicum and Practicum Support Modules for administrators who have never received the ELD Practicum professional development.

Please contact Dona Lawrie, Language Acquisition Branch at 213-241-5582 should you have any questions regarding the ELD Practicum.

Appendix 2F: Implementing a Two-Way Bilingual Immersion Program

Email communication from Rosa Molina. Two-Way California Association for Bilingual Education (CABE). January, 2009.

The following elements are determined to be the factors that are necessary for the successful implementation of a Two-Way Bilingual Immersion (TWBI) program (equivalent to dual language):

1. The TWBI Program must be designed as a "choice program" for families of EO and EL students that want to participate in the TWI program. Parents should be asked to sign **parent compacts** that are also signed by the school district officials and make a multi-year commitment.
2. Program needs to be designed K-12 so that you don't have to re-negotiate for a program when the kids get to middle school/high school. A Task Force should be gathered to write a master plan delineating the components of the programs so that all staff and new staff in years to come to understand the most important components of a successful TWBI program.
3. Classes should be formed so that they are linguistically balanced to ensure a balance of ELs and EO students so that you have student language models in each of the languages.
4. All staff members (admin, teachers, classified, district level support) associated with the program must attend multiple inservices to understand the program components and know how to market the program to the families from the community.
5. Teachers must be carefully selected and demonstrate both grade level knowledge and native-like literacy in the Spanish language (target language) and English.
6. Assessments in English and Spanish must be selected for on-going measures of both academic and linguistic progress of the students in the program to include: CELDT, CST and Aprenda (primary language testing)
7. Parents should be offered informational evenings to describe the program elements and outcomes in terms of academics in both languages –
 - Preschool and K Orientations
 - Monthly trainings
 - Annual reviews of the program elements for each grade level
8. The Spanish language must become the status language as students work to become bilingual and biliterate. The language must be promoted throughout the school and school newsletters, websites, etc. Parent Meetings and parent materials should always be translated.
9. TWBI Teachers participate in monthly planning, preservice and inservice to develop a strong repertoire of skills enabling them to deliver the TWBI program successfully.
10. TWBI Teachers and paraprofessionals must sign on and know that they will be engaged in extensive professional development networks to plan, study and research effective practices.
11. The TWBI Instructional day is designed to allow students instruction in both languages on a daily basis.
12. 90/10 TWBI Program Designs demonstrate the most promising research results in terms of ensuring both English and Spanish competencies.

Appendix 2G: SDAIE Strategies

From: Sweetwater Union High School District, Chula Vista, CA
<http://www.suhd.k12.ca.us/suh/---suhionline/sdaie/glossary.html>

SDAIE Strategies

A Glossary of Instructional Strategies

Anticipatory Chart - Before reading a selection, hearing a selection or viewing a video students are asked to complete the first two sections of the chart-"What I already know about" and "What I would like to find out about" After the information has been presented students complete the "What I learned..." section. Responses are shared with a partner. This is also known as a KWL Chart

Anticipatory Guide - Students are given a series of statements that relate to a reading selection, lecture, or video. Students indicate AGREE or DISAGREE. After the information has been presented, students check to see if they were correct.

Brainstorming - Students work as a whole group with the teacher, or in small groups. Begin with a stimulus such as a word, phrase, picture, or object and record all responses to that stimulus without prejudgment. Prewriting or INTO strategy. The students give ideas on a topic while a recorder writes them down. The students should be working under time pressure to create as many ideas as possible. All ideas count; everything is recorded. More ideas can be built on the ideas of others.

Carousel Brainstorming - Each small group has a poster with a title related to the topic of the lesson. Each group uses a different colored marker to write 4 to 5 strategies/activities that relate to their topic. Students rotate to all the other posters, reading them and adding 2 to 3 more strategies. Students discuss the results.

Character Matrix - In groups, students create a grid, which lists the characters horizontally on the left and character traits vertically across the top. The students determine the traits used. Group members decide if each character possesses each of the traits and writes "yes" or "no" in the appropriate box.

Choral Reading - Groups of students chorally present a poem, or other reading selection. One person reads the title, author, and origin. Each person says at least one line individually. Pairs of students read one or more lines. Three students read one or more lines. All students read an important line.

Clustering/Webbing/Mapping - Students, in a large group, small groups, or individually, begin with a word circled in the center, then connect the word to related ideas, images, and feelings which are also circled. Prewriting or INTO strategy.

Comprehension Check - The teacher or students read the selection aloud. Intermittently, the teacher asks for verbal and nonverbal comprehension checks ("raise your hand", "thumbs up for

'yes' ", "thumbs down for 'no'." The teacher uses a variety of question types: *Right There, Think and Search, On My Own* (See QAR, Day One.)

Co-op Co-op - Students work in teams to complete a project. The steps are: student-centered class discussion, selection of student study teams, team building and skill development, team topic selection, mini-topic selection, mini-topic preparation, mini-topic presentations, preparation of team presentations, team presentations, evaluation.

Cooperative Dialogue -

1. Students number off one through four.
2. Each student pairs with another student from a different group who has the same number.
3. Following the timeline from the article that was previously read each pair writes a dialogue between two characters in the passage.
4. Pairs are selected to present dialogues in chronological order to the class. activity is designed to be a text "re-presentation."

Cooperative Graphing - This activity involves graphing information based on a survey. Each group of four will take a survey of how many countries each has visited (or other teacher-determined information). A bar graph is then developed. Each person in the group is responsible for one aspect of the graph, and signs his/her name on the chart along with their area of responsibility. Jobs are: survey group members and record results, construct the graph, write names and numbers on the graph, write title and assist with graph construction. Each person in the group describes his/her part of the graph to the class.

Corners - Cooperative activity used to introduce a topic. The teacher poses a question or topic along with four choices. On a 3x5 card students write their choice and the reasons for it. Students go to the corner of the room representing their choice. In their corner, students pair up and share their reasons for selecting that corner. The topic is discussed. For example, the corners could be labeled cone, cube, pyramid, and sphere with information about each figure provided. Students go to the corner, learn about the figure, and return to teach other team members.

Directed Reading-Thinking Activity This is a group activity to get students to think about the content of a fiction or non-fiction reading selection. The steps are 1) Students predict what they will read and set purposes for reading. 2) Students read the material. 3) Students discover if their predictions and hypotheses are confirmed.

Famous Person Mystery - The name of a famous person, living or deceased is placed on the back of each student. Without looking, students try to guess who the person is by asking questions that require only yes/no answers.

Graphic Organizers - Graphic organizers are charts, graphs, or diagrams, which encourage students to see information as a component of systems rather than isolated facts. Students may complete these as they read or view a presentation. There are a variety of ways to use graphic organizers, including the following: semantic word map, story chart, Venn diagram, spider map, network tree, word map, and KWL chart. Other examples of graphic organizers are listed below.
Comparison-Contrast Matrix-Students determine similarities and differences between two

people, things, solutions, organisms stories, ideas, or cultures.

Branching Diagrams -Organization charts, hierarchical relationships systems, family trees.

Interval Graphs-Chronological order, bar graphs, parallel events, number value.

Flowcharts - Sequential events, directions, decision making, writing reports, study skills.

Matrix Diagram-Schedules, statistics, problem solving, comparisons with multiple criteria.

Fishbone Diagram-Cause and effect, timeline.

Group Discussion, Stand Up and Share, and Roam the Room - After the teacher asks a question, students discuss and report their group findings to the class. Teams can share their best answer, perhaps on the board at the same time, or on an overhead transparency. When an individual student has something important to share with the class, he or she stands up. When one person from each group is standing, the teacher calls on one of these students for a response. If others have a similar response, they sit down. Students move around the room to view the work of other teams. They return to their teams to Round Robin share what they have learned.

Hot Topics - Students title a sheet "Hot Topics". This sheet is kept in an accessible place in their notebooks or portfolios. Students brainstorm with the teacher on possible topics of interest related to the content of the course. Each student writes down at least ten Hot Topics and adds to the list throughout the year. Students occasionally choose one Hot Topic and write in depth on the topic as a class assignment or as homework. These may be included in their portfolios.

Idea Starts -Use a prompt for writing, such as a quote, a photo, words from a vocabulary list, an article, a poem, opening lines to a story, an unusual object, a film, or a guest speaker to get students started.

Image and Quote with Cooperative Poster - Groups of four are formed. Students read a selection. Each chooses a quote and an image that have impact for them. Round Robin share. Groups come to consensus on favorite image and quote. Each student takes one colored pen. With all members participating, and each using their chosen color, they draw the group image and write the group quote on a piece of butcher or easel paper. Each member signs the poster with his or her pen. Posters are shared with the class.

Inside-Outside Circle - Students are arranged into two equal circles, one inside the other. Students from the smaller inside circle face those in the outer larger circle and vice versa. Students ask each other questions about a review topic. These may be either teacher or student generated. Students from one of the circles rotate to either the left or right. The teacher determines how many steps and in which direction. Another question is asked and answered.

Interactive Reading Guide - Working in groups, students write down everything they know about a reading selection topic. Then, they write three questions they want to have answered by the selection. Each student reads a short first section silently; then students retell the information with a partner. Next, the first ___pages (teacher's choice) are read aloud in the group, each person taking a turn to read. Then, the group predicts four things that will be discussed in the next section. The groups finish reading the chapter silently. Each person writes four thinking questions for a partner to answer. (Why do you think ? Why do/did ___ ? How does ___relate to your life or experiences? Compare ___to __. What if___? Predict _____) Papers are

exchanged and answers are given to each other's questions. Finally, with a partner, a chart or diagram is drawn to illustrate the main points of the chapter.

In-Text Questions - Students answer teacher-constructed questions about a reading selection as they read it. Questions are designed to guide students through the reading and provide a purpose for reading. Students preview In-Text questions first then answer them as they read the article. Students review their answers with their small group, then share them with the whole group.

Jigsaw - 4-6 people per "home" team. Name the teams. Within each team, number off 1-4. All ones form an "expert group," as do twos, threes, and fours. Each expert group is assigned a part to read (or do). Experts take 15 minutes to read, take notes, discuss, and prepare presentations. Return to home teams. Each expert takes 5 minutes to present to home team.

Journals -Students keep questions and ideas in a journal. These may be used later to develop a formal piece of writing.

Key Words Story Prediction - In their groups, students using key words listed by

Language Experience Approach - This is a reading strategy based on a common experience. The students dictate a story to the teacher, who then records the story. The teacher then uses the reading as a practice on word recognition, sentence patterns, and vocabulary items.

Learning Logs - Double-entry journals with quotes, summaries, notes on the left and responses reactions, predictions, questions, or memories on the right.

Line-Ups - Line-ups can be used to improve communication and to form teams. The entire class lines up according to a specific criteria (age, birthday, first letter of name, distance traveled to school, etc.). The end of the line can move to the head of the line and pair up until each person has a partner. This is called "folding the line." Teams of four members can then be formed from this line-up.

Multiple Intelligences Inventory Given a list of preference statements organized according to the eight multiple intelligences, students place checks next to those that are true for them. By totaling the number of checks per intelligence students are able to determine areas of strength and weakness.

Novel Ideas - Groups of four are formed. Each group member has a sheet of paper with the team name or number in the corner. Each person writes, "We think a story/selection entitled (insert appropriate title) might be about ..." Each person then has one minute to list what he or she thinks the story might be about. For example, a story entitled "Eleven" might be about a football team, roll of dice, etc. Each person draws a line. Members Round Robin share their lists. As each member shares, other members add new ideas to their lists. Groups then take turns standing in a line and reading their possible topics for the whole group. Topics may not be repeated. All students add new or "novel" ideas, not on their lists.

Numbered Heads Together - A 5-step cooperative structure used to review basic facts and information. Students number off 1 to 4. Teacher asks a question. Students consult one another to

make sure everyone can answer the question. Teacher randomly picks a number from 1 to 4. Those students with that number raise their hand: Teacher randomly chooses one of the groups. The group member with the previously-selected number answers the question. After the student responds, the other teams may agree with a thumbs up or a thumbs down hand signal. Teacher may ask another student to add to the answer if an incomplete response is given.

Open Mind Diagram - Each person in a group of four uses a different colored marker to participate in the poster creation. Students draw a shape of a head and, inside the head, write words, quotes from the story, symbols and pictures. Words can be made into pictures of parts of the face.

Pairs Check - Cooperative pairs work on drill and practice activities. Students have worksheets. One student answers the first question while a second student acts as the coach. After the coach is satisfied that the answer is correct, then roles are reversed. Then this pair can check with the other pair on the team. If all agree, then the process continues. If they do not agree, students try one more time to figure out the answer, or ask for help from the teacher.

Pantomime-A-Tale - This technique can be used with fiction or nonfiction reading selections. Divide an article into sections. Each group prepares their assigned section as a pantomime. There should be one group member who reads the section, with appropriate pauses, and three members who act it out without using words. Rehearsal is important, so allow time for it.

Pass the Picture -Each person in a group has a visual of a person. A blank sheet of paper is clipped to the back. The teacher asks a question (e.g., "What is his/her name?"). Students write the answer in a complete sentence on the blank paper. Students then pass the visual and the paper to the student on the right. The teacher continues asking questions and students continue writing the answer, then passing the visual to the right for 6-8 questions. At the end, each student will have a descriptive paragraph for each visual. Each student takes a visual and shares it with the group while reading **the final** paragraph description.

Picture This - This activity is useful as a vocabulary or concept review. A blank paper is divided into eight sections. Students draw pictures or symbols to represent words or major concepts. Students are not to label the drawings. Students exchange papers with a partner and partners try to correctly label each other's drawings.

Pie Graph - Using the results of the Multiple Intelligences inventory students draw a pie graph representing how they are smart on a paper plate. Students may color, make designs, or draw symbols for each section. Students can determine the size of each section by creating a fraction that represents each intelligence. The total number of checks is the denominator and the number of checks for that section is the numerator. This fraction can then be changed to a percent by dividing the numerator by the denominator.

Posters - As a BEYOND activity students create a poster in small groups. The following list describes several types of posters that the teacher may assign.

Illustrated Timeline Tell the plot or sequence on a timeline, with pictures that depict the events.

Movie Poster Advertise the content from a lesson by creating a movie poster complete with

ratings, pictures, actors, descriptions, and comments by a critic.

Comic Strip Create a 6-paneled comic strip of the lesson content.

Image and Quote Choose an image and quote from the lesson content that are representative or important. Poster should include a title.

Advertisement Choose an item from the lesson content and make a newspaper or magazine ad for it.

PQRST Study Strategy - **Preview:** Student skims the title, side headings, pictures and graphics to identify writer's generalization. **Question:** Student identifies questions that the writer is going to answer during the reading. **Read:** Student reads to obtain answers to the questions and takes notes. **Summarize:** Student summarizes the information regarding each question posed. **Test:** Student tests the generalization against the supporting information to see if the author has enough information to support the generalization.

Prediction - Students make a prediction about the subject they are about to read by selecting an answer to a multiple-choice question.

Question-Answer Relationship (QAR) - This program teaches students strategies for answering questions. It also points out the sources for different kinds of questions. Here are the three types of answers:

Right There The answer is located directly in the reading

Think and Search The answer is "between the lines." The reader needs to analyze, make inference and/or predict the answer based on the information in the reading.

On My Own The answer is "beyond the lines." The reader must base the answer on his/her own experience.

Quickdrawing - Students sketch ideas that relate to a topic. Prewriting or INTO strategy.

Quickwrite - Pre-reading or pre-writing focus activity. Students are asked to respond to a question in writing for 5 minutes. Emphasis is on getting thoughts and ideas on paper. Grammar, spelling, style not important.

Quickwriting - Students respond quickly to a prompt without self-editing. If students get stuck they can repeat phrases over and over until a new idea comes to mind. Prewriting or INTO strategy.

RAFT - May be used in any content area to reinforce information and check for understanding. Individuals or groups of students write about information that has been presented to them. The teacher determines the role of the writer, audience, format, and topic (RAFT). For example, in a science class, students are asked to write using the following RAFT - Role of Writer Cloud; Audience Earth; Format Weather report; Topic Explanation of upcoming thunderstorms.

Ranking and Consensus Building - Students individually rank items in a list from least important to most important. Each group or pair comes to a consensus on the order.

Read Around Groups - After completing a writing assignment, students are divided into groups

of equal size. A group leader collects the group's papers then, in a clockwise direction, passes them to the next group. Each member of the group receives one paper then reads it. Readers star a line they especially like. One minute is allowed for reading and marking each paper. At signal the students pass the paper to the person on the right. After reading the papers of one group, the group chooses one paper to read aloud to the class. If time allows, groups may continue to pass papers until everyone has read all the papers.

Reader Response Chart - Students draw a T-chart on their paper. On the left side they write 3 interesting quotes from the story and on the right side students respond to the quote with personal reactions, memories, questions, compare/contrast, or something to learn more about.

Reading Circles/ Book Clubs Once students choose a book from a selection of 4 to 5 titles, they form a group with those reading the same book. Students read and solve the teacher-designed activities that relate to their book. The group shares with the class what they have learned from their reading.

Reading Guide

1. Headings Read -Around- Students take turns reading the headings of the reading
2. Prediction Chart- With their group, students choose two headings and predict what will be discussed in those sections. Students write their answers on a prediction chart with the following labels: "Heading", "Prediction", "Yes or No". In their groups, students take turns reading the first page aloud, and finish reading the selection in silence. They write "yes" or "no" on the prediction chart to indicate whether or not their predictions were correct.
5. Thinking Questions- Students write one thinking question (Why..., How..., Compare..., What if...), and exchange papers to answer each other's questions.

Reading Log- Students complete while reading a selection. The left-hand side contains topic headings for sections of the reading. Students are to briefly summarize each topic. On the right--hand side students reflect on the implications of each topic.

Reciprocal Teaching - Two students work together to read a passage. Each may have a text or they may share a text. Student A reads one paragraph aloud, then asks Student B one or two good questions. (See QAR below.) B answers or explains why (s)he cannot. A and B discuss questions and answers. The process is repeated in reverse.

Reflections - Students reflect, in writing, on what was learned, what was confusing, and connections of this lesson to other lessons/other content areas/real world. Students may also reflect on their progress as a student, what to do differently next time, or what was liked about the topic.

Round Robin - Cooperative learning structure in which team members share ideas verbally on a topic. Group members share in order, without interruption, comment, discussion, or questions from other members so that everyone has an opportunity to share.

Round Table - The teacher asks a question that has many possible answers. In groups, the students make a list of possible answers by one at a time saying an answer out loud and writing it down on a piece of paper. The paper is then passed to the next student to record another answer. The process continues until the teacher tells the students to stop.

Same-Different - In pairs, students sit across from but different, pictures. Their job is to fill out what is the same and what is different in their pictures, without seeing what the other sees. Each student has a recording sheet. Students alternate recording the similarities and differences they find. One resource is Same-Different: Holidays by Dr. Spencer Kagan, Kagan Cooperative Learning 1 (800) WEE CO-OP. SDAIE STRATEGIES GLOSSARY

Send-A-Problem - Each student on a team makes up a review question and writes it on a 3x5 card. The writer asks the question of the other members of the team. When everyone agrees on an answer it is written on the back of the card. The teams then send their review questions to another team. Teams respond by having one student read the first question. Each team member writes down an answer. Team members then compare and discuss their answers. If they agree, they turn the card over to see if they concur with the sending team. If not, they write their answer on the back of the card as an alternative answer. A second student reads the next question, and so on. The stacks of cards are sent to a third, then a fourth group until all teams have had a chance to answer all questions. When the cards return to the senders, the teacher should provide an opportunity to discuss and clarify.

Startling Statements - Students are told not to look at the startling statement (question) that they have on their backs. They circulate asking five others to provide an estimate for an answer. After finding the average of the five estimates provided by others, students look at their statements (questions) and write their own estimate if they disagree with the average. Actual answers are given after the students share estimates with the whole group.

Tableau - The students form a tableau of characters or scenes or concepts. The teacher directs students regarding their positions and facial expressions. Students hold their positions in a brief tableau.

Tap-A-Word - Students practice pronouncing words or phrases by using a combination of claps, hitting the table, and snapping the fingers. the teacher. In Round Table style, each member uses a word from the list, in the order given, in a sentence to create a collaborative story.

Think-Pair-Share - When asked to consider an idea or answer a question, students write their ideas on paper (think). Each student turns to another student nearby and reads or tells his or her own responses (pair, share). This is an oral exchange, not a reading of each other's papers.

Three Step Interview - Group participants letter off A-B-C-D. They use the following interview steps in order to share what they have written in a quickwrite until they all have been read. Step 1: A interviews B C interviews D Step 2: B interviews A D interviews C Step 3:A interviews C and D about B B interviews C and D about A, C interviews A and B about D, D interviews A and B about C.

Verbalizing -Students share with a partner ideas they have on a topic. Pre-writing or INTO strategy.

Visualization - In response to a teacher prompt, students visualize in their mind a particular time or place and concentrate on sensory images. (Tell students to "turn on the TV in their minds.")

Vocabulary Cards Each student selects a difficult vocabulary word from the story and creates a card in the following manner: The word and its definition in the front, and a drawing and the vocabulary word in a sentence in the back. These cards are shared with team members, then exchanged with other groups.

Appendix 3B: Resources for Career Education and a College-bound Culture

Hoyt, K., Marland, S. Career Education Syllabus—Overview of career education programs in Arkansas. <http://www.clt.astate.edu/dagnew/CMLP98.HTM>

This document defines career education terms, provides a history of career education, discusses the differences in vocational and career education, and provides a continuum for career education curricula from elementary school through adult education.

ASU Mothers and Daughters program

This program seeks to develop a college-bound mind-set in young Latinas and their mothers. <http://diverseeducation.com/article/11830/1.php>

“ASU partners with 14 school districts in Phoenix and the East Valley to mentor students, raise their aspirations and teach skills for them to succeed. The university said the program has promoted higher education to more than 6,000 young women and their mothers over the years.”

We will investigate partnership with USC, Foshay Learning Center, and West Adams Preparatory High School to initiate a similar program.

LOS ANGELES UNIFIED SCHOOL DISTRICT

Student Health and Human Services

Health Education Programs

Beliefs

We believe that all children must be healthy to be educated, and must be educated to be healthy.

We believe that all student academic achievement depends upon safe and drug-free schools, and healthy, resilient youth.

Vision

The vision of the Health Education Programs unit is for all students to have optimum physical, social, and emotional health and have campuses that are violence-and drug-free so that they will be enthusiastic learners and able to achieve their highest academic potential.

Mission

The Mission of the Health Education Programs Unit is to assist schools in providing for the health education needs of all the students and ensuring that campuses are violence and drug-free environments where students and other stakeholders can be safe and where all students can achieve their highest academic potential.

Why Teach Health?

The Health Education Programs (HEP) staff coordinates much-needed services to ensure that schools are safe, drug-free, and conducive to learning. Many adolescents are coming to school with a variety of health-related problems that make successful learning difficult, if not impossible. Moreover, the following research findings show that promoting assets and resilience among students is correlated with both greater motivation to achieve and less involvement in risky behavior.

1. Recent research indicates that adolescents who use drugs have been found to have reduced attention spans, lower interest in homework, lower grades, more negative attitudes toward school, increased absenteeism, and higher dropout rates.
2. Coping difficulties associated with stress-related violence both at school and at home threaten academic performance and are exhibited by lack of interest and behavior problems at school, low grades, low self-esteem, and a high dropout rate.
3. Emerging evidence suggests exposure to violence has lifelong effects on learning.
4. Exposure to neighborhood and school violence contributes significantly to the prediction of poor school attendance, inappropriate behavior, and low grades among a sample of secondary school students.
5. Schools that enhance child skill development through health education, parenting classes, and teacher training see increases in students' school connectedness and achievement.
6. Childbirth during the high school years is associated with significantly reduced academic achievement and other negative education outcomes.

"What we do in the name of health, safety, and well-being is linked with teaching and learning. Teaching and learning can't take place if students aren't healthy, aren't physically and mentally fit, or aren't safe"

William Modzeleski, Safe and Drug Free Schools Program, U.S. Department of Education

Appendix 4C: California Assessments

California Assessment System 2009–10

| Test | Type | Participants | Grade Level(s) | Content Tested |
|---|---|---|---|--|
| Standardized Testing and Reporting (STAR) Program | CSTs | CR SB MC PA All students unless their individualized education program indicates assessment with CAPA or CMA. | 2–11 | Grades 2–11 English-Language Arts • Mathematics Grade 7 Writing Grades 8–11 History-Social Science Grades 5, 8–11 Science |
| | CAPA | CR SB PA Students with significant cognitive disabilities who are unable to take the CSTs even with accommodations or modifications and whose individualized education program indicates assessment with CAPA. | 2–11 | Grades 2–11 English-Language Arts • Mathematics Grades 5, 8, 10 Science |
| | CMA | CR SB MC PA Students whose individualized education program indicates assessment with CMA. For a complete list of criteria, please go to: http://www.cde.ca.gov/ta/tg/sr/particip/criteria.asp | 3–11 | Grades 3–9 English-Language Arts Grades 3–7 Mathematics Grades 7–11 Algebra Grade 7 Writing Grades 5, 8, 10 Science |
| | STS | CR SB MC Spanish-speaking English learners who either receive instruction in their primary language or have been enrolled in a school in the United States less than 12 months. | 2–11 | Reading/Language Arts • Mathematics |
| | EAP | SB MC PA Voluntary. | 11 | Augmentations to CSTs in: English-Language Arts • Algebra II Summative High School Mathematics |
| CELDT | CR SB MC PA All newly enrolled students whose primary language is not English must take the test within 30 calendar days after they are enrolled in a California public school for the first time. The CELDT also must be given once each year to English learners until they are reclassified. | K–12 | Grades K–12 Listening • Speaking • Reading • Writing | |
| CAHSEE | CR SB MC PA All grade 10 students. Students in grades 11 and 12 and adult students who have not previously passed. Students with disabilities are exempt from meeting the CAHSEE requirement as a condition of graduation or receiving a diploma. | 10–12 Adult students | English-Language Arts • Mathematics | |
| PFT | CR PA All students. | 5, 7, 9 | Aerobic Capacity • Body Composition Abdominal Strength and Endurance Trunk Extensor Strength and Flexibility Upper Body Strength and Endurance • Flexibility | |
| CHSPE | CR MC PA Voluntary. Ages 16 and up or completed grade 10. | — | Reading • Language • Mathematics | |
| GED | CR MC PA Voluntary. Age 18. Age 17 if eligible. | — | Reading • Writing • Mathematics Science • Social Science | |
| NAEP | CR MC A sample of grade eligible students in selected schools. | Grades 4, 8, 12 | U.S. History • Civics • Geography Writing • Mathematics | |

Note: Results include individual, school, district, county, and state except for EAP—individual only, NAEP—national and state only, CHSPE—individual, school, and district only, and GED—individual only.

Legend:

STAR - Standardized Testing and Reporting Program
CSTs - California Standards Tests
CAPA - California Alternate Performance Assessment
CMA - California Modified Assessment
STS - Standards-based Tests in Spanish
EAP - Early Assessment Program

CELDT - California English Language Development Test
CAHSEE - California High School Exit Examination
PFT - Physical Fitness Test
CHSPE - California High School Proficiency Exam
GED - General Educational Development
NAEP - National Assessment of Educational Progress

SB - Standards-based
CR - Criterion-referenced
MC - Multiple choice
PA - Performance assessment

Appendix 5A: Educational Research and Dissemination (ER&D)

<http://www.aft.org/topics/teacher-quality/erd.htm>

The American Federation of Teachers Educational Research and Dissemination (ER&D) Program is a union-sponsored, research-based professional development program. It is designed to help local unions build the capacity to deliver high-quality professional development services, either on their own or in collaboration with their school districts. The AFT has long recognized that a research-grounded knowledge base is essential to professional practice. The ER&D Program was created in 1981 to encourage classroom educators to improve their practice and their students' performance by becoming users of research. The American Educational Research Association awarded ER&D its highest honor as an exemplary program that "bridges the gap between research and practice." Beginning with a single course delivered to teachers in three pilot sites, the program has now expanded to include 12 strands that are available to all union constituents—teachers, paraprofessionals, and school-related personnel—in more than 200 locals across the country.

The ER&D Program meets the criteria for "high quality professional development" as defined in the No Child Left Behind Act of 2001. ER&D delivers scientifically based research in a focused, sustained framework that promotes the application of research-validated concepts and strategies.

<http://www.aft.org/topics/teacher-quality/downloads/WhatisERD.pdf>

Appendix 5B: Professional Development Research

The current state of research shows that good teaching can make a significant positive impact on student achievement and that certain professional development programs have shown great promise in improving teachers' efficacy by large margins. Research also demonstrates that many if not most professional development efforts do not live up to this promise and are, in fact, ineffectual. A review of the research and the professional development programs that were found to be effective suggests the following elements are key to developing an effective professional development program:

- **Alignment with curriculum:** Teachers must be engaged in learning that is highly relevant to the curriculum they will be teaching their students. Therefore all professional development sessions must be tightly aligned to subject matter content, instructional methods, and the timing of when teachers will present the material to their students.
- **High-Intensity:** Anything worth teaching is worth teaching in-depth. One-shot workshops are widely thought to have little or no impact. Effective professional development efforts ranged from thirty-two to thirty-six hours over one school year. In addition, successful efforts involved teachers from entire grade levels or schools, thus raising the likelihood of extra collaborative learning after-hours. High-intensity training can be measured both in hours of commitment and depth of focus.
- **Sustained Intensity:** Effective professional development efforts took a long-range approach and were implemented over one to two years.
- **Immediate Feedback:** The most effective professional development intervention that has been identified, studied by Angrist and Lavy (2001) gave teachers immediate feedback through weekly training.

Research on Effective Professional Development

Angrist, Joshua D. and Lavy, Victor. Does Teacher Training Affect Pupil Learning? Evidence from Matched Comparisons in Jerusalem Public Schools. *Journal of Labor Economics*. Vol 19. No. 2. April, 2001. pp. 343 – 369.

The Impact of Teacher Training on Student Achievement: Quasi-Experimental Evidence from School Reform Efforts in Chicago. *The Journal of Human Resources*, University of Wisconsin Press. Vol. 39, No. 1. Winter, 2004. pp. 50-79. Stable URL: <http://www.jstor.org/stable/3559005>. Accessed: 22/11/2008 03:34

Lee, Okhee, Deaktor, Rachael, Enders, Craig, and Lambert, Julie. Impact of a Multiyear Professional Development Intervention on Science Achievement of Culturally and Linguistically Diverse Elementary Students. *Journal of Research in Science Teaching*. Vol. 45. No. 6. pp. 726-747. 2008.

Research on Teacher Effectiveness

Finds wide variation in teacher effectiveness:

Clotfelter, Charles, Ladd, Helen F., and Vigdor, Jacob. How and Why do Teacher Credentials Matter for Student Achievement? *Calder Working Paper 2*. National Center for Analysis of Longitudinal Data in Education Research. March 2007.

Suggests that teachers who are one standard deviation above average have a positive impact of about one-fifth of a standard deviation on the test scores of their students:

Rivkin, Steven G., Hanushek, Eric. A., and Kain, John F. Teachers, Schools and Academic Achievement. *Econometrica*, Vol. 73. No. 2. March 2005. 417-458.

Demonstrates that successful teachers are unequally distributed:

Clotfelter, Charles, Ladd, Helen F., Vigdor, Jacob, and Wheeler, Justin. High Poverty Schools and the Distribution of Teachers and Principals. *Calder Working Paper 1*. National Center for Analysis of Longitudinal Data in Education Research. March 2007.

Suggests that most of the positive effects from highly-skilled teachers fade out over time:

Jacob, Brian, Lefgren, Lars, and Sims, David. The Persistence of Teacher-Induced Learning Gains. *NBER Working Paper Series*. National Bureau of Economic Research. Cambridge, MA. June 2008.

Appendix 5D: Professional Development Evaluation Form

| | 4 | 3 | 2 | 1 |
|---------------------|---|---|--|---|
| Alignment | Every activity and all material connect directly to material I will teach my students over the next several weeks. | Activities and materials connect to what I teach my students over the course of the year. | Many activities and most materials connect to what I teach my students. | I see few connections between what I teach and the materials and activities presented here. |
| High-Intensity | This session engaged my full interest and had everyone actively working on relevant activities. | This session kept me engaged with active, relevant activities. | This session lost my interest at times. | I had difficulty focusing on the material and activities presented. |
| Sustained Intensity | Our grade-level or school team has plans in place for how to begin implementing these ideas in our teaching. | I have a plan on how to implement these ideas in my teaching. | I can see some ways to implement these ideas in my teaching. | I am not sure how to implement these ideas, or I have little interest in doing so. |
| Feedback | I receive regular feedback on my classroom implementation of what I learn in PD and how it compares to model implementations. | I receive occasional feedback on my classroom implementation of what I learn in PD and how it compares to models. | I have access to models of exemplary classroom implementations of the materials and activities in this PD. | Little or no feedback on my implementation is available without my sustained effort. |

How will you use what you have learned in this session in your own classroom? What modifications do you anticipate needing to make?

How can this professional development session be improved?

Appendix 8A: Community Engagement Resources and Models

The following is just the beginning of a list of community engagement resources and models that *CES #15* will use to help forge strong ties to the community. The principal will be responsible for furthering this list and ensuring that contacts with these groups are initiated, developed, and utilized.

The USC Family of Schools Network

The USC Family of Schools program is made up of more than 1,300 USC students, faculty and staff that work with thousands of parents, teachers, school administrators, neighbors, police officers and other community representatives to develop ways in which children can access the community's rich resources, including its institutions of higher learning, its museums, libraries and recreation facilities.

<http://www.thenewsroom.org/usc/20090707/usc-awards-850000-community-programs.html>

Education Consortium of Central Los Angeles

The Education Consortium of Central Los Angeles is a group that brings together local resources – individuals and organizations dedicated to working in partnership – to address the challenges faced by local students seeking quality education.

Appendix 8B: Magnolia Place – Services Available

PARENTING

Parent and Child Art Program

This free 8 week arts program allows parents and children to spend time together exploring art forms including crafts, drama, music and improvisation games. Please contact Esmeralda Jordan (213) 342-0185.

Family Services

An in-home/center counseling program that assists parents with resources, referrals and parenting education training. Please contact Sandra Diaz (213) 342-0191.

Parenting Classes

The curriculum includes topics such as child development, discipline, health and safety, differences and diversity, and communication. Please contact Esmeralda Jordan (213) 342-0185.

NuParent

Parenting education from the last trimester of pregnancy through 5 years of age. Topics are: bonding, communication, infant massage, child development, routines, guidance and discipline, getting ready to learn and also lots of fun activities. Please contact Marylou Romero (213) 342-0172.

Foster Care & Adoption

Interested in becoming a foster or adoptive parent? For information on our next info session call (800) 730-3933.

SCHOOL READINESS

Infant/Toddler and Family Enrichment Program (0-5 years)

A program for parents and children under the age of 5 years old to enhance relationships between parent and child as well as strengthen parenting skills. Please contact Claudia Solano (213) 342-0101.

PACE Head Start & Children's Bureau Preschool Programs

Magnolia Place provides service to children 3–5 years old and their families to develop skills that will increase the children's success in kindergarten. Please contact Claudia Solano (213) 342-0101.

Family, Friends & Neighbors

A program that provides training, resources and mentorship to increase nonlicensed childcare providers' capacity to provide safe and nurturing care for children ages 0–5. Please contact Tina Moreno (213) 342-0182.

HEALTH

St. John's Well Child & Family Clinic Center

Center provides primary preventive medical and dental services including physical examinations, immunizations, prenatal care and dental hygiene. Call (213) 749-0947.

Health Program

This program utilizes Promotoras to emphasize the prevention of common childhood illnesses and the promotion of healthy habits. Please contact Esmeralda Jordan (213) 342-0185.

ECONOMIC DEVELOPMENT

Financial Fitness Club

Improve your financial success by attending our workshops about money, paying yourself first and your credit. Please contact Ana Anguiano (213) 342-0100.

Small Business Guidance and IDA Opportunities

PACE will give onsite orientations regarding small business start-up trainings, consultation, and financial programs available. Please contact Ana Anguiano (213) 342-0100.

Early Childhood Care & Education Class

LA Adult School teaches early childhood development and child care techniques --- 20 credits toward certification and ECE degrees. Please contact Nancy Rodriguez (213) 342-0184.

English as a Second Language (ESL)

LA Adult School improves parent and child school readiness by teaching English as a second language. Please contact Esmeralda Jordan (213) 342-0185.

COMING SOON

Legal Services

Public Counsel, EDN (Eviction Defense Network), and Para los Niños have teamed up to provide legal services for community members, including issues relating to housing/tenancy protection, immigration, and domestic issues.

For more information please contact Ana Anguiano at (213) 342-0100

www.all4kids.org

Appendix 8C: Support from the people who know our students and community

The following people at Magnolia Elementary School and Vermont Avenue Elementary School support our combined Local District 7/UTLA proposal for *Central Region Elementary School #15*.

Magnolia Elementary School

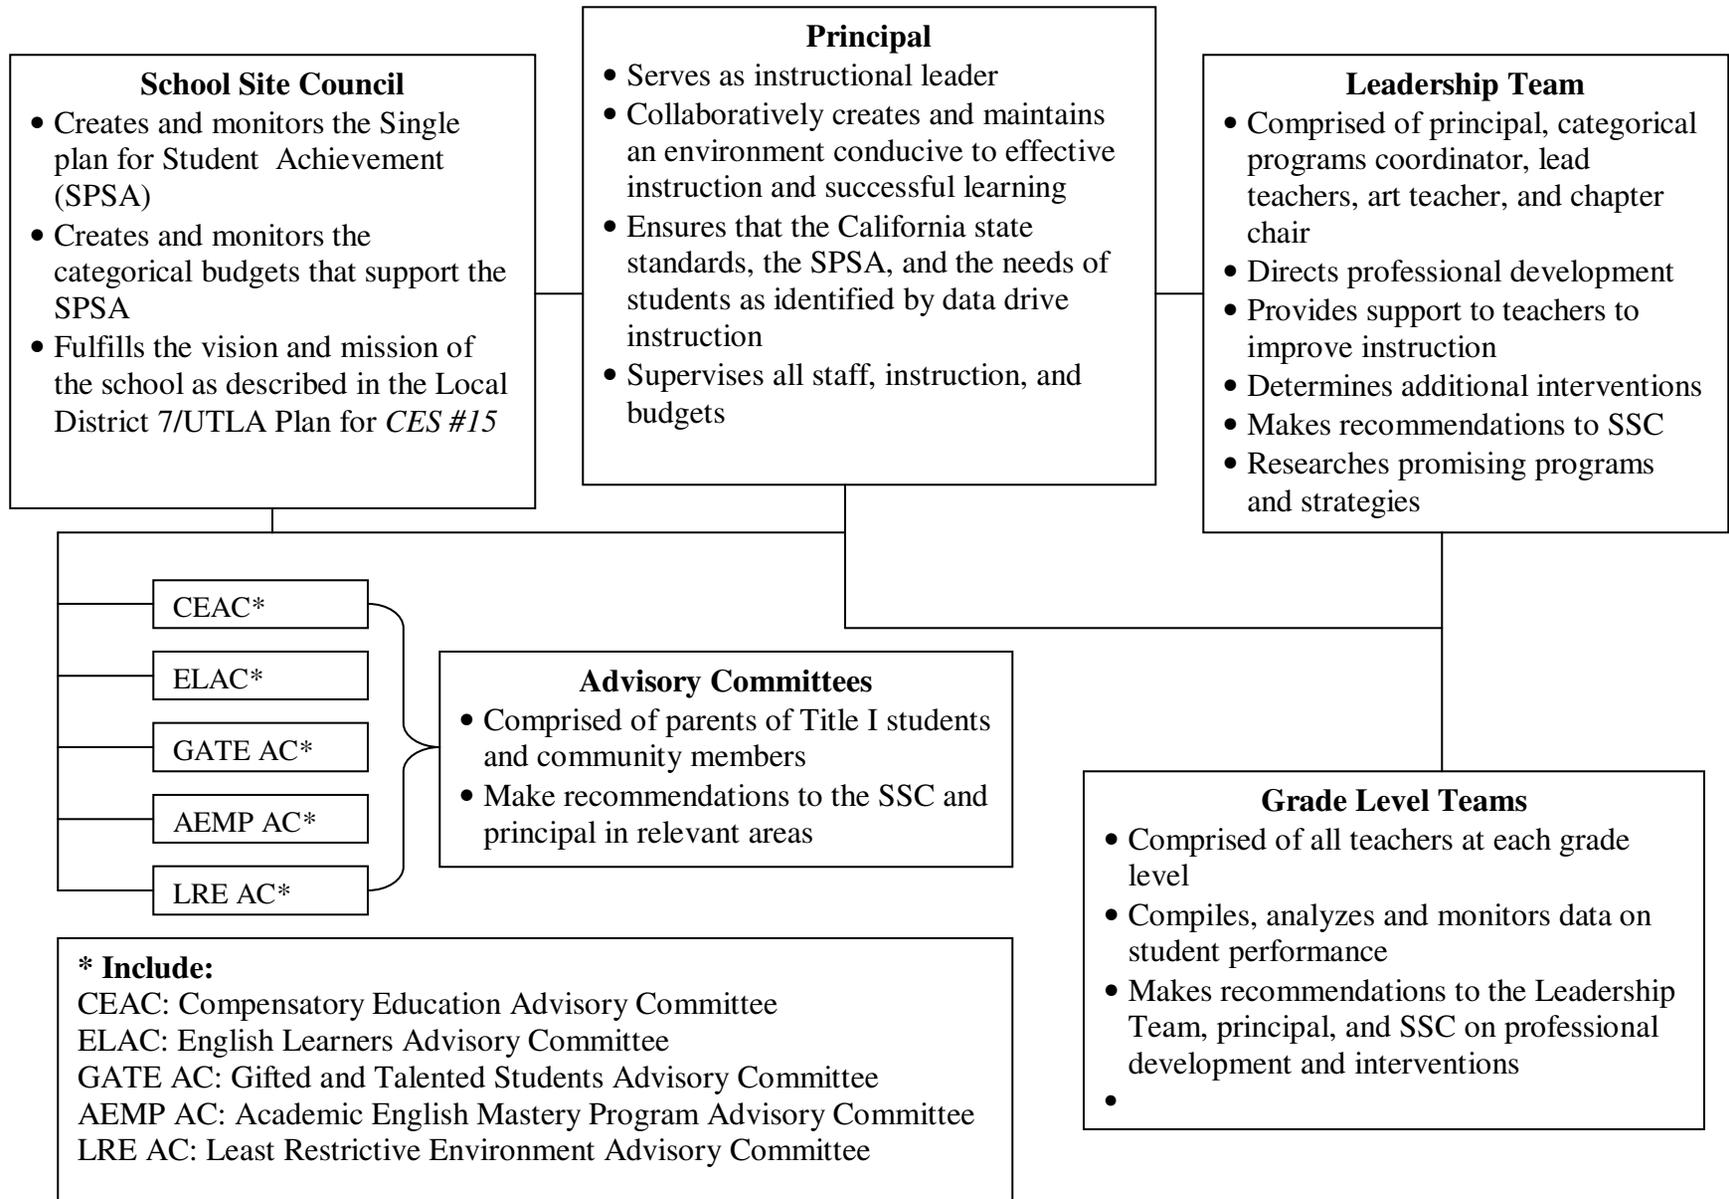

Luis Velasco, Principal
Mark Beck, UTLA Chapter Chair
Carmen Chavez, UTLA Co-chair

Appendix 10B: Job Description for Principal

NATURE AND SCOPE OF JOB:

The school Principal serves as the educational leader, responsible for managing the policies, regulations, and procedures to ensure that all students are supervised in a safe and respectful learning environment that meets the approved curricula and mission of the school. In order to achieve academic excellence the school Principal will work collaboratively with all members of the school staff hired and communicate effectively with all stakeholders.

JOB FUNCTIONS AND RESPONSIBILITIES:

1. Establish and promote high standards and expectations for all students and staff for academic performance and responsibility for behavior.
2. Supervise the instructional programs of the school, by evaluating lesson plans and observing classes (teaching, as duties allow) on a regular basis.
3. Provide strong instructional leadership.
4. Collaborate with staff to establish procedures for evaluation and selection of instructional materials and equipment.
5. Ensure a safe, orderly environment that encourages students to take responsibility for behavior and creates high morale among staff and students.
6. Establish a professional and respectful rapport with students and with staff. Display the highest ethical and professional behavior and standards when working with students, parents and school personnel.
7. Research and collect data regarding the needs of students, and other pertinent information including the collection of detail regarding the sacraments students have received or are preparing for.
8. Work with staff to seek ideas for the improvement of the school. Conduct meetings, as necessary, for the proper functioning of the school: weekly meetings for full-time staff; monthly staff meetings.
9. Assume responsibility for the health, safety, and welfare of students, employees and visitors.
10. Ensure that all operational systems are in place and functioning effectively.

Appendix 10C: Research on Effective School Leadership

Michael Fullan, Selected References

Michael Fullan is recognized as one of the foremost authorities on school leadership and change. According to his biography, he has “developed a number of partnerships designed to bring about major school improvement and educational reform. He participates as researcher, consultant, trainer, and policy advisor on a wide range of educational change projects with school systems, teachers’ federations, research and development institutes, and government agencies in Canada and internationally. He has published widely on the topic of educational change.” The following is a partial selected list of publications he has either authored, edited, or contributed to in some way.

- *The New Meaning of Educational Change, 3rd Edition* (Teacher College Press)
- *Leading in a Culture of Change* (Jossey-Bass). 2001.
- *Bass Reader on Educational Leadership* (Jossey-Bass)
- *The Six Secrets of Change: What the Best Leaders Do to Help Their Organizations Survive and Thrive.*
- *The Role of the head in School*
- *What’s Worth Fighting for in Your School? Working for Improvement?*
- *The Literacy Principal: Leading, Supporting, and Assessing Reading and Writing Initiatives*
- *What’s Worth fighting for in the principalship? Strategies for taking charge in the elementary school principalship.*

Reeves, D. B. (2006) *The Learning Leader. How to Focus School Improvement for Better Results*. Association for Supervision and Curriculum Development. Alexandria, VA

Successful Principals develop focused missions and monitor instruction closely

Based on a study that reviewed 15 case studies of successful turnaround elementary schools, successful principals developed highly focused missions to guide improvement, and were described as spending a lot of time in classrooms, monitoring teachers and modeling good teaching. Each successful school case study indicated that teachers were involved in making important school-level decisions.

Quoting from ASCD Briefs:

Transformative school leaders focus on priorities

The best school leaders create a sense of community and collaboration while keeping their focus on teaching and learning, writes Educational Leadership editor in chief Marge Scherer. Schools improve when leaders focus on the essentials, such as literacy, and are "transformers" -- striving to make their school a better place for students and staff.

[Educational Leadership](#) (10/2009)

Great leaders offer clear goals, make fair decisions

A former classroom teacher who works as an educational consultant and literacy coach writes that quality school leadership is essential to education. Rebecca Alber offers teachers a few ways to spot great leaders. Administrators should offer clear goals, make fair decisions, have a firm grasp on classroom instruction and be visible in the classroom, she writes. Edutopia.org (8/14)

Award-winning principal has inclusive management style

Middle-school Principal Sheila Kahrs has been honored for her leadership style, which includes shared decision-making. Kahrs includes teachers in some hiring decisions, prevents high turnover by focusing on mentoring and uses data to drive instruction. Despite a high number of low-income students, the school produces some of the highest test scores in Georgia. [Education Week \(premium article access compliments of EdWeek.org\)](http://EducationWeek.com) (9/16)

Inspiring Principal Spends 80% of Work Time in Classrooms

Principal Matthew Tessier has led one California elementary school off of a federal watch list for poor student achievement, and he is close to doing the same for a second. Tessier spends about 80% of his work time in classrooms, emphasizes writing instruction and gives educators 90 minutes per week to share instruction ideas and techniques. "It starts with leadership," said his district's superintendent. "He's the type of person that inspires greatness." [San Diego Union-Tribune](http://SanDiegoUnionTribune.com) (9/19)

Appendix 10D: Lead Teacher Job Description

Qualifications:

- Permanent status in LAUSD or other public school district
- Minimum of five years of teaching experience at the elementary school level (K-6)
- CLAD or BCLAD certification
- Valid California elementary teaching credential
- Meet standard performance ratings on Stull Evaluations in the preceding four years, have no Notice of Unsatisfactory Service
- Recognized as “Highly Qualified” teacher under terms of ESEA (NCLB)
- Two letters of recommendation from former colleagues (preferably one teacher, one administrator)
- Experience in teaching or mentoring teachers (Master teacher for student teachers, BTSA support provider)
- Experience in collaborative planning, delivery of instruction, and differentiated professional development
- Teaching experience at multiple grade levels
- Evidence of expertise in at least one, preferably two, of four areas (English Literacy, Spanish Literacy, Math, and Science)

Roles and Responsibilities

- Team with another lead teacher to teach one regular elementary school class
- Teach half time each day. Collaborate with lead teacher partner to ensure consistent learning environment and delivery of instruction.
- Lead individualized professional development in one of four areas half time each day.
- Participate with leadership team to develop a rubric for assessing and improving teachers’ instruction, based on high-quality models
- Observe teachers and provide written and oral feedback using an agreed upon rubric designed to help teachers identify the next steps they can take to improve student performance
- Conduct demonstration lessons that drive student achievement and respond to the identified needs of individual teachers
- Analyze student achievement data and facilitate teachers’ analysis of data to support problem solving
- Together with the leadership team and based on student achievement data, collaboratively plan and deliver professional development sessions, including lesson study.

Note: The lead teacher position does not evaluate teachers, but provides feedback to improve instruction.

Appendix 12A: Budget

| Traditional School | Students | Per Student | TOTAL |
|---------------------------|-----------------|--------------------|--------------|
| I.M.A. (General Revenue) | 525 | \$30 | \$15,750 |
| S046 (Title One) | 525 | \$402 | \$211,050 |
| S 536 (Bilingual Els) | 420 | \$292 | \$122,640 |
| S536 (ReDes) | 80 | \$188 | \$15,040 |

CES #15

**Los Angeles Unified School District
Single Plan for Student Achievement Accountability Matrix**

Safe Schools

Local District 7 has a Safe Schools goal for all its elementary schools that states “Students will attend safe and orderly schools.”

ES #15 will adhere to district policies and school rules. Visitors to our school will enter a warm welcoming environment where it is evident that we have done the following:

- Established systems with clear expectations for staff, parents, students and all stakeholders,
- Trained each new teacher on how to establish and enforce classroom and school standards and behavior,
- Instituted an incentive program for students and staff
- Developed and implemented a school-wide discipline plan,
- Maintained a clean, attractive and orderly campus that fosters a positive nurturing learning environment for students,
- Classrooms are clean, orderly, well equipped and reflect quality teaching and learning,
- Established systems for reporting needed repairs,
- Maintained a closed campus that adheres to District Policy, and
- Displayed appropriate signage.
