## **INTRODUCTION**

On August 29, 2004 the Board of Education is scheduled to adopt the Superintendent's 2004-05 Final Budget. The SACS-2004, the official State budget form, will be transmitted to the County Office of Education no later than September 8, 2004, in accordance with State law. The District's budget document provided to Board Members and the public will reflect, in summary form, the detail of the anticipated revenues and expenditures planned for the 2004-05 fiscal year.

This document, the Program (Appropriations) Document supplement to the Superintendent's 2004-05 Final Budget, is intended to provide more detailed information, by program code ("appropriation code" or "account"), for the budget and expenditure data summarized in the District's official budget documents.

### **ORGANIZATION OF THIS DOCUMENT**

The Program (Appropriations) Document is organized to reflect the organization of the District's budget document. It is divided first by Fund, beginning with the General Fund, and continuing with the Special Funds. The General Fund, which is the primary operational Fund for the District's basic instructional program, is further divided by District Defined Program. District Defined Programs are components of the General Fund which, due to the size of their budgets or other factors, are of particular interest to the Board and the public. Examples of District Defined Programs are the Special Education Program, Targeted Instructional Improvement Program, Options Program, etc.

For each program code, the Program (Appropriations) Document reflects first the actual expenditures for the 2002-03 fiscal year. The next series of columns reflect the 2003-04 Approved Budget (the amount approved by the Board initially for the 2003-04 fiscal year), the Modified Budget as of 6-31-04 (reflecting any budget adjustments approved between July 1, 2003 and June 30, 2004), and the actual expenditures for the 2003-04 fiscal year. The final column reflects the amount for the appropriation in the 2004-05 Final Budget.

### **GENERAL FUND – REGULAR PROGRAM**

Pages 1 through 30 reflect the appropriation detail of the District's General Fund, Regular Program budget, divided by District Defined Program. This detail includes all adjustments to the 2004-05 Final Budget through June 30, 2004. The detail in this section exactly reflects the summarized General Fund data that were transmitted to the County Office of Education in the SACS-2004 document.

### **GENERAL FUND – SPECIALLY FUNDED PROGRAMS**

One important difference between the Superintendent's 2004-05 Final Budget document and the Program (Appropriations) Document is that the latter excludes General Fund –

Specially Funded Programs (SFP). SFP programs are categorical in nature and the appropriation detail is largely determined through the actions of the schools that receive the funds. Because this distribution of funds to accounts is not known at the time the Final Budget is published, the amounts in the Final Budget are primarily estimates pending the implementation of the programs at school sites. Examples of General Fund SFP programs are ESEA – Title I, Economic Impact Aid, Federal No Child Left Behind Program Grant funds, etc.

Because SFP programs are not included in this document, the total amount of funding reflected herein will not equal the amount included in the District's published 2004-05 Final Budget document or in the SACS-2004 report.

## SPECIAL FUNDS

This document also reflects the District's Special Funds budgets (pages 31 through 62). Special Funds are Funds other than the General Fund that are established by the Board for specific purposes, such as adult education or the financing of school construction. Many Special Funds have specific State or federal funding sources. A brief narrative description is provided for each Special Fund. As is the case with the General Fund, SFP funding for Special Funds is not reflected in this document.

## LARGEST GENERAL FUND (REGULAR PROGRAM) PROGRAM CODES (APPROPRIATIONS)

Pages 63 to 87 provide information on the 113 accounts over \$7 million and 10 credit accounts in the General Fund-Regular Program Budget. A brief description of each is included with selected ones showing prior year actual expenditure data.

FUND

# **GENERAL PROGRAM**

General Program includes most positions and other resources providing services directly to regular K-12 classroom and magnet schools. This section also reflects most school support resources, as well as Local District offices and central offices administrative support positions and expenses. Included in the General Program are norm/teaching and other basic norm positions at schools and funding for school textbooks and instructional materiel. This section also includes resources for a variety of special programs, including K-3 and 9<sup>th</sup> Grade Class Size Reduction and Gifted and Talented Education.

# **SPECIAL EDUCATION PROGRAM**

Special Education Program includes positions and other resources providing instructional and support services to students who have special needs because of physical, emotional, intellectual or learning disabilities. These pupils may attend either regular or special schools, or may be assigned to nonpublic schools at District expense if an appropriate District program cannot be developed for them. This section includes special education program costs for both the regular school year and extended school year.

# **RESERVES AND RESOURCE ALLOCATIONS**

Reserves and Resource Allocations are utilized in the budget as a means of setting aside funds for which the exact usage is not yet known at the time of budget adoption (“Pending Distribution accounts”), or for which Board approval is required before expenditures can occur (“Undistributed Reserves”). Funds in these accounts must be transferred to expendable appropriations before they can be utilized.

# **ROUTINE REPAIR AND GENERAL MAINTENANCE**

Routine Repair and General Maintenance Program reflects funding for basic building repairs and maintenance, in accordance with California Education Code sections pertaining to the State Building Program. Under current law, a district's participation in the State Building Program is dependent upon utilizing 2% of its General Fund budget, including its deferred maintenance matching effort, for routine repair and maintenance of buildings. Support from Child Development Fund can also cover the 2% requirement.

# **BUILDING FUND – MEASURE K BOND PROCEEDS**

A local school facilities bond measure, passed by the voters on November 5, 2002. Measure K proceeds may be used to repair, renovate, acquire, construct or lease school buildings, including classrooms, libraries, restrooms, science laboratories, and other capital projects. Proceeds may also be used: to acquire instructional materials (including library books); upgrade fire/security systems; perform earthquake retrofitting; install lighting, plumbing, and heating; remove asbestos and lead paint; upgrade wiring for computers; and build new neighborhood schools to relieve overcrowding. Funds may not be used for non-Measure K-related administrative salaries.

## **LARGEST GENERAL FUND (REGULAR PROGRAM) PROGRAM CODES (APPROPRIATIONS)**

Within the General Fund-Regular Program Budget, there are 1,035 program (appropriation) codes. These are distributed as follows:

Dollar Value of Accounts	Number of Accounts	Dollar Value of Accounts
Over \$1 billion	1	1,694,040,076
Between \$500 million and \$1.0 billion	1	588,444,883

Credit Accounts Between \$10,000 and \$99,999	6	(324,739)
Credit Accounts Between \$0 and \$9,999	10	(28,578)
Total	1,035	\$5,534,688,388

The following pages provide information on the 113 accounts over \$7 million that are in the General Fund-Regular Program Budget. The amounts shown may include carryover funds. Carryovers are prior year's funds budgeted but not fully expended which are carried forward based on District policy or as a special request approved by the Chief Financial Officer.

The chart above also identifies 10 credit accounts that are included in the budget. These accounts are largely a budget/accounting tool to spread expenditures to appropriate programs. For example, there are credits in the budget that reduce the general program budget/expenditures by the amount that is eventually transferred to the special education program. By using these credits, part of the cost of principals, clerical staff and certain other expenses in regular schools are charged to special education.

In order to provide accurate information, the account titles shown in bold type are expanded versions of the titles that appear in the District's computer system.

### **Definitions:**

#### **U = Unrestricted**

Program Codes (Appropriations or Accounts) identified as "unrestricted" may be used for any purpose determined by the Board of Education.

#### **R = Restricted**

Program Codes (Appropriations or Accounts) identified as "restricted" may be used only for the specific type of student or the specific services designated by the grantor. Within the broad designations, the Board of Education usually has considerable latitude in how they meet the students' needs or how they provide the required services. Examples of restricted funding include Special Education, Gifted and Talented, and Targeted Instructional Improvement Program (Integration).

In some cases, restricted programs “encroach” on the District’s general purpose funding. In other words, the program required by the State or Federal government costs more than the funding provided. If a program encroaches, any dollar saved is essentially unrestricted; similarly, each additional dollar spent reduces the unrestricted funding available for other purposes.

**NA = Not Applicable**

Program Codes (Appropriations or Accounts) identified as “NA” are usually pool accounts that are used as an accounting tool to track certain costs such as health benefits.

**District Defined Program**

A “District Defined Program” is any large or significant program operating within the General Fund. These include the General Program, Special Education, Options Programs, Hourly Intervention/Remediation Programs, After School Programs, Targeted Instructional Improvement Grant (Integration), Regional Occupational Center/Skill Centers, Interfund Transfers, Reserves and Resource Allocations, and Routine Repair and General Maintenance.

This ongoing account provides the funding (salary, benefits and mileage) for classroom teachers in all K-12 regular schools based on established district norms. This account does not include teachers for options schools or special education schools or classes.

Norm tables are used to determine the number of teachers allocated to a school based on student enrollment as of the close of the first school month and the District/State established class size.

5185	02	<b>Employee Health, Medical &amp; Group Life</b>	General	NA	District-wide	\$588,444,883
------	----	--	---------	----	---------------	---------------

This ongoing account is a “pool” account that summarizes the cost of employee health, medical and life insurance across all GFRP programs. These benefits are provided to employees who work more than half time, in accordance with the collective bargaining agreements. The account also includes the costs of benefits provided to retirees. These monies plus those allocated in other District Funds (such as the Adult Education Fund) are transferred to the Health and Welfare Benefits Fund, which then makes the payments to health care providers.

The cost of health, medical and life insurance benefits are also budgeted in each GFRP program that includes employees who are eligible for benefits. A credit account is used to avoid double counting these benefits.

2005		Total	\$403.5	\$213.0

This ongoing account provides for the costs of special day class teachers (salaries, benefits and mileage) for identified students with special needs in regular and special education schools. Students are assigned to these classrooms based on their Individualized Education Programs (IEP's). Class sizes vary in accordance with the severity of the handicap.

The budget for certificated salaries seems low in relation to historical expenditures. Special education assistants (classified employees) previously budgeted in this program are now budgeted in program 2215.

5197 05 **State Teachers Retirement System (STRS)** General NA District-wide \$200,303,735

This ongoing “pool” account summarizes LAUSD’s required contributions to the State Teachers Retirement System (STRS) for certificated GFRP employees. LAUSD pays 8.25% of most certificated salaries. (Employees are also required to contribute to the retirement system from their pay). Similar accounts are budgeted in other District Funds (such as the Child Development and Adult Education Funds).

This ongoing account provides for the cost of nonpublic school (NPS) tuition and services from nonpublic agencies for special education students who are eligible for such services in accordance with their IEP's. These students are usually the most severely handicapped. It also provides for the costs for students enrolled in LAUSD programs but receiving supplemental services from outside providers, partly because of the shortage of special education teachers.

Expenditures for nonpublic schools and agencies have been increasing over the last several years, but the Special Education Division is working to provide more of these services in-house in 2004-05.

5225 08 **Workers' Compensation Self-Insurance Premiums** General NA District-wide \$144,021,841

This ongoing account is a "pool" account that is used to accumulate the workers' compensation premiums that are budgeted throughout the various programs of the General Fund. Workers' compensation insurance or self-insurance is required by law. Every three years, an actuarial study is conducted to evaluate the adequacy of the funding; rate adjustments are then made based on the study results.

This ongoing account provides for administrative positions (salaries, benefits and mileage) for all regular schools based on established norms. It does not include the administrative positions for options schools or special education schools.

There will be more K-12 school administrators in LAUSD during 2004-05 due to the opening of new schools.

This ongoing account provides for custodians and plant managers (salaries, benefits and mileage) for regular schools. Custodial positions for options schools and special education schools are budgeted in other program codes.

Positions are allocated to individual schools based on a formula that includes enrollment and square footage factors. Based on a Board Resolution establishing a 5-year custodial restoration plan, this account has been increased by \$5.7 million in 2001-02 (second year of five-year plan); for 2002-03 and 2003-04, the Board approved a delay in the expansion program. However, additional custodians will be added in 2004-05 as new schools open.

6972	11	<b>Reserve for Anticipated Balance-Unrestricted-Dr</b>	General	U	District-wide	\$110,551,867
------	----	--	---------	---	---------------	---------------

Most years, the District's actual expenditures are less than the amounts that schools and offices were authorized to spend. Small differences between budget and expenditures are common, and simply reflect the fact that plans and actual implementation are rarely identical. For example, for various reasons a budgeted position may be vacant for a period of time. Large differences between budget and expenditures can be due to late implementation of programs, inexperience or conservatism in estimating costs, and/or deliberate decisions to postpone spending, as when a school saves up its textbook money in order to purchase a new textbook series. Ending fund balances can also be higher than expected if actual income is higher than initially budgeted.

This account has been established for the first time in 2004-05, according to the District's Board-approved finance policy, to enable the District to estimate the amount of under expenditure it expects in unrestricted accounts in the current fiscal year. Since we don't have a track record of making such estimates, we can only say that we will only know at the end of the year if this estimate was a good one.

This ongoing “pool” account is used to summarize LAUSD’s payments to the Public Employees Retirement System (PERS). PERS is the retirement system for most classified employees.

PERS rates fluctuate from year to year, depending on the health of the PERS fund. In years when PERS rates are reduced, the state “recaptures” the savings. The money returned to the state through this “recapture” process is shown in object 3800. The program codes used to record GFRP expenditures for PERS are 2062 and 2063.

It does not cover the costs of substitutes provided when teachers are away from their classroom on District business (e.g., serving on a committee, bargaining session or conference).

In some prior years, the District did not budget enough in this account to cover the full cost of substitutes. The 2004-05 budget was increased during the budget development process to reflect actual expenditures more accurately, then reduced by \$7 million to reflect the District's intention to improve employee attendance and thereby reduce substitute teacher costs. The reduction in the 2004-05 budget compared to actual 2003-04 expenditures is only \$1.4 million.
