

Watch School Proposal Review - Site Summary

South East HS

Reviews for: South East High School

	Reviewer	Recommended?	Comments
WATCH SCHOOL: South East HS	Reviewer A	YES	The school has been showing increases in AYP and API, but the school recognizes that it needs improvement in Literacy and Math scores, in graduation rates, in dropout prevention and especially in sub-groups (EL and Special Ed). The emphasis on Themes and Concepts is a very promising approach, replacing a very heavy emphasis on strategies. The design has a good overall plan for the summative assessment, but it is not clear how the formative assessments work and how they are used.
	Reviewer B	YES	<p>South East High School's plan is complete, clear and coherent. It reflects a thorough understanding of key issues, which have been identified through data analysis. <i>The Complex</i> has addressed each area of focus, in detail, and provided research-based strategies for accelerating student learning and sustaining academic achievement.</p> <p>The proposed goals for implementation and student achievement are ambitious, realistic, and appropriate. The goals are based on the school's current data; in addition, the strategies listed throughout the plan, address the needs of the students, and are evidence-based. There are certain responses that are unclear and/or inconsistent, such as whether The Complex is proposed to function as small schools or a comprehensive high school, with SLCs. Clarification is recommended.</p>
